### STUDENT REPORT

# DETAILS

#### Name

Syed Rahamatulla

#### Roll Number

3BR23ME021

#### EXPERIMENT

**Title** 

NUMBER MATCH

#### Description

Given a match between team A and team B represented by an array, the task is to determine which team wins based on the occurrences of even and odd numbers in an array.

BRZ

#### Rules:

- If an even number has an even occurrence, it supports team A; otherwise, it supports team B.
- Similarly, odd numbers support team B if they have even occurrences, otherwise, they support team A.
- If there's a tie, print 'T 0'.

#### **Input Format:**

The first line contains an integer n, denoting the number of elements in the array.

The second line contains n integers separated by space, representing the array elements.

#### **Output Format:**

If either of the team wins display the team name ('A' or 'B') and how much support the team wins separated by space. Else if there is a tie display "T 0"
